

DYNASAFE Product Information MBDC

MBDC – Mobile Bomb Disposal Chamber

The MBDC has an open top design which protects against high-speed fragments and blast waves in a horizontal plane.

The Dynasafe MBDC minimizes the direct effects of large amounts of explosives detonating. This design allows for flexibility in a large range of applications where the characteristics of this kind of chamber are sufficient.

The MBDC is equipped with the Dynasafe ILC - Integrated Loading Crane, which makes it possible to remotely load the MBDC from a safe distance.

A double-axle trailer is standard. It can be towed by a SUV, station wagon or similar vehicle. It can be configured to handle different amounts of explosives.

The Mobile Bomb Disposal Chamber is only recommended for use outdoor in relatively open areas.
