

DYNASAFE Product Information SLB

SLB – Suppression Litter Bin

500 g TNT exploding in an ordinary Public Litter Bin. (at the peak of the detonation)

The bomb proof Suppression Litter Bin is a product resulting from the cooperation between Peoples of Denmark and Dynasafe of Sweden. Dynasafe has developed the inner bomb suppression chamber and Peoples has taken care of the design and functionality of the outer chamber/waste bin.

The SLB provides the safety you want in a beautiful design and with user friendly functionality.

The unique “2 in one – concept” allows using the SLB with or without the suppression chamber. This means that you can adjust your safety level to your actual safety demand.

The SLB is in everyday use at the Copenhagen Airport in rough surroundings where a waste bin has to be emptied up to 50 times a day. It has also been tested in dynamic explosion tests at Bofors Test Center using real detonations and actual explosives.

Key strengths:

- High suppression capacity
- Attractive design
- Flexible use – with or without inner bomb suppression chamber
- Functionality – easy to empty
- Thoroughly tested
